Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim 13 is rejected under 35 U.S.C. 102(e) as being anticipated by Ohhata et al. (6,658,217).

Ohhata et al. (Fig. 3) disclose an optical receiver comprising: a differential amplifier (A3); a gain control circuit (GC) can be read as an auto gain control circuit; and an offset control circuit (OC), independent of the gain control circuit (GC) having the connections and functions thereof.

Allowable Subject Matter

Claims 1-12, 17 are allowed.

Claims 14-16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 1-12, 17 call for, among others, an auto gain control circuit a direct current gain amplifier, first and second peak detectors having the connections as claimed.

Claims 14-16 call for, among others, a schematic of the offset control circuit and the automatic gain control circuit having the connections as claimed.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The additional references (Bouvier (6,774,727); Chiou et al. (6,803,825)) show further analogous prior art circuitry having DC offset cancellation and gain control, respectively.
